

WATCH OUT!

Just as the cost of fuel has increased, so has the number of motorcycles on our roadways.

Be mindful and watch out for motorcyclists!

Intersections

Most crashes between cars and motorcycles involve turning left at an intersection.

Before turning left or crossing traffic, please look twice.

Distance

Motorcycles need more time to react safely to road and weather conditions.

It is important to allow for safe following distance.

Visibility

Motorcycles are smaller and harder to see, great care needs to be taken to watch for them in traffic.

Always use your mirrors and check over your shoulder.

Lane Use

Bicycles, scooters, motorcycles and cars are entitled to use a full lane while traveling.

Make our roadways safer and Share the Road!
